Dear Chris:

We would like to thank you for the exceptional support you gave to the "ROCKET" migration staff. Without your help on the data tables, the project would not be the success that it was. As you know, we rewrote a CICS batch count application to run on the RS/6000. When the response time for the count request was not acceptable with the ENCINCA file structure, we were able to convert to the "data table" structure, but not without your expert assistance.

Anthony Cozzini and I appreciate all the effort you have provided us for this project. Thank you again for your exceptional support.

Janet Alfano
